Journal of Fluid Mechanics Volume 525 **25 February 2005**

G. Haller	An objective definition of a vortex	1
R. Di Leonardo, F. Ianni & G. Ruocco	Flow between rotating finite disks with a closed end condition studied by heterodyne photon-correlation	27
M. E. Goldstein & S. J. Leib	The role of instability waves in predicting jet noise	37
N.-Q. Nguyen & A. J. C. Ladd	Sedimentation of hard-sphere suspensions at low Reynolds number	73
P. Clavin & F. Williams	Asymptotic spike evolution in Rayleigh–Taylor instability	105
H. Liang & T. Maxworthy	An experimental investigation of swirling jets	115
A. R. Kasimov & D. S. Stewart	Asymptotic theory of evolution and failure of self-sustained detonations	161
L. H. Shih, J. R. Koseff, G. N. Ivey & J. H. Ferziger	Parameterization of turbulent fluxes and scales using homogeneous sheared stably stratified turbulence simulations	193
W. R. C. Phillips	On the spacing of Langmuir circulation in strong shear	215
I. Otić, G. Grötzbach & M. Wörner	Analysis and modelling of the temperature variance equation in turbulent natural convection for low-Prandtl-number fluids	237
G. De Stefano, D. E. Goldstein & O. V. Vasilyev	On the role of subgrid-scale coherent modes in large-eddy simulation	263
E. B. White & W. S. Saric	Secondary instability of crossflow vortices	275
M. Greco, O. M. Faltinsen & M. Landrini	Shipping of water on a two-dimensional structure	309
M. Payr, S. H. Vanaparthy & E. Meiburg	Influence of variable viscosity on density-driven instabilities in capillary tubes	333
Y. Yoon, M. Borrell C. C. Park & L. G. Leal	Viscosity ratio effects on the coalscence of two equal-sized drops in a two-dimensional linear flow	355
